Bandung, Indonesia

Portfolio: graceghefira.vercel.app

System Administrator with hands-on experience in managing Linux-based production infrastructure, Kubernetes platforms, and containerized applications. Experienced in deploying, troubleshooting, and optimizing enterprise applications using Docker, Kubernetes, Helm, GitLab CI/CD, Jenkins, and Argo CD. Passionate about cloud-native technologies and AI infrastructure, with experience supporting scalable platforms, optimizing system performance, and building secure, reliable, and highly available production environments.

Education

TELKOM UNIVERSITY Diploma of Telecommunication Technology, GPA: 3.82/4.00	2022-2025
BINUS UNIVERSITY Bachelor of Computer Science	2025-Present

Work Experience

PT. Quantus Telematika Indonesia System Administrator	2025
- Administer and maintain Linux-based production infrastructure, ensuring high availability, system reliability, and optimal performance across development and production environments. - Deploy, upgrade, and manage containerized applications using Docker, Kubernetes, Helm, Nginx, and container registries while supporting production releases with minimal downtime. - Troubleshoot complex production issues involving Pods, Deployments, StatefulSets, Services, Ingress, Persistent Volumes, ConfigMaps, Secrets, networking, and cluster resources, performing root cause analysis and performance optimization. - Manage Kubernetes cluster operations, including workload scheduling, resource allocation, storage provisioning, node management, cluster upgrades, and infrastructure maintenance. - Build and maintain CI/CD and GitOps workflows using GitLab CI/CD, Jenkins, and Argo CD to automate application deployment, configuration management, and software delivery. - Deploy and support internal enterprise applications, including application configuration, database connectivity (PostgreSQL, MySQL, Redis), reverse proxy configuration, SSL/TLS management, and production troubleshooting. - Configure and integrate authentication services using OpenID Connect (OIDC), APISIX, Istio, and Kiali to provide secure access and traffic management for containerized applications. - Research, evaluate, and implement cloud-native technologies through Proof of Concept (PoC), focusing on Mirantis Kubernetes Engine (MKE), Lagoon, k0s, and other Kubernetes ecosystem solutions to support enterprise infrastructure. - Design and maintain AI infrastructure by deploying Flyte workflows, integrating MinIO and Ceph Object Storage, and managing GPU-enabled Kubernetes workloads for scalable AI/ML pipeline execution. - Monitor infrastructure health, application performance, and cluster resources, perform capacity planning, support infrastructure migration and platform upgrades, and create technical documentation to improve operational efficiency.	
PT. Adhikari Inovasi Indonesia System Engineer	2024-2025
- Set up and optimize server environments to meet the specific needs of applications and ensure smooth operation - Configure Docker environments, including creating and managing images, containers, and utilizing Docker Hub for image distribution - Perform application deployment using web servers like Nginx, ensuring seamless integration and minimal downtime - Collaborate with development teams to integrate front-end and back-end components effectively, ensuring functionality and performance	

- Develop and maintain CI/CD pipelines using Jenkins to automate build, test, and deployment processes, streamlining software delivery
- Utilize tools such as Prometheus and Grafana to build comprehensive server monitoring dashboards for performance tracking and issue identification
- Implement robust security measures, including firewall configuration, SSL certificates, and intrusion detection, to safeguard server infrastructure

Competitions and Committees

Campus Ambassador	2024
• Logistic Committee Member for the Farewell Party for Graduation Period II • Liaison Officer Committee Member for PKKMB	
Student Digital Innovation Competition	2024
• Designed an IoT-based air quality monitoring device and served as the director for a video production	
Research Project	2024
• Developed a Face Recognition System for Guest Registration in Hotel Restaurants	
Village Community Empowerment Program	2023-2024
• 2023 : Leveraging Maggot Potential with IoT-Based Solutions • 2024 : Digital Marketing Strategies Through Web Marketing	
Innovillage	2023
• Developed a Public Wi-Fi Station	
Bank Indonesia Article Writing Competition	2023
Laboratory Assistant for Electrical Circuits	2023

Skills

- **Hard Skills:** Linux, Docker, Kubernetes, Helm, GitLab CI/CD, Jenkins, Argo CD, Mirantis Kubernetes Engine (MKE), Lagoon, k0s, Flyte, GPU Workload Management, MinIO, Ceph Object Storage, PostgreSQL, MySQL, Redis, Nginx, APISIX, Istio, Kiali, Prometheus, Grafana, Git, Bash Scripting, MQTT, WebSocket, DNS, TCP/IP, TLS/SSL
- **Soft Skills:** Relationship Building, Problem-Solving, Analytical Thinking, Time Management, Project Management, Adaptability, Public Speaking, Presentation Skills
- **Language:** English
